

ORDER DENYING 115 MOTION FOR PROTECTIVE ORDER entered by Magistrate Judge Paul Singh Grewal. The court has considered the parties' arguments in their respective briefs and at the hearing held earlier today. After the hearing the court further considered the particular case cited by counsel at the end of the hearing: *Abbott Diabetes Care Inc. v. Roche Diagnostics Corp.*, Case No. 05-3117, 2007 WL 4166030 (N.D. Cal. Nov. 19, 2007). On balance, the court is persuaded that neither a protective order nor an in camera review of the settlement agreement at issue is warranted. Whether the agreement is ultimately material to the question of the hypothetical license here remains to be seen. But the prejudice to MobileIron from access to the agreement by Good's outside counsel is clearly outweighed by Good's need to evaluate the agreement under *Georgia-Pacific Factor 2* and *ResQNet*. The motion is DENIED. (This is a text-only entry generated by the court. There is no document associated with this entry.) (Entered: 09/25/2014)
